

## THE MAXBULLET® HARDWARE SYSTEM CAN BE MOUNTED TWO WAYS.

- Above opening
- Inside mount within opening

### HELPFUL HINTS FOR MEASURING

When using side wall mount, overlap the opening at least 3 inches on each side and 1 foot above the door opening for a better seal. Therefore, order your door 1 foot taller and 6 inches wider than actual door opening.

When using an inside mount, order the same size door kit as your clear opening.

- For taller doors, the strips should be heavier and wider.
- Narrow strips are easier to pass through than the wider strips.
- When air movement is a problem, choose the wider strip.
- Fasteners for mounting hardware to the existing building materials are **not** included.

## Products Available from Centaur®

### PRICING AND MEASURING GUIDE

# KleerFlex Door®

Clear flexible strip doors offer a brilliant solution to doorways

### RAIL FENCING

- Hot Rail® 5" Flexible Rail
- Centaur® 5" Flexible Rail

- Lets fresh air in but keeps birds and insects out
- Indoor/outdoor use
- Door kits available

- Keeps flies out! Insects perceive the amber color as black and will not try to enter.

## KleerFlex Door® Strips

- Keeps birds, insects and dust out
- Ideal for temperature regulation
- Smooth edges help prevent cutting
- Concave to promote a tighter seal
- Non-stick additive to prevent clinging
- Formulated for indoor/outdoor applications, withstanding temperatures from -10°F to 150°F

## MaxBullet® Hardware

The MaxBullet® Hardware features a unique bullet-shaped locking feature for easy snap-on/snap-off strip replacement. Once the hardware is attached to a door frame, no tools are required to attach strips. Initial hardware installation is 75% faster! Strip replacement is 90% faster! Made from 6061 alloy aluminum (aka - aircraft aluminum).

MaxBullet® aluminum hardware comes with a **LIFETIME GUARANTEE.**
